

Dear colleagues, dear students,

on **23th May 2025** the **10th Research Day** of the University Medicine Halle will take place.

With this Research Day, we aim to show the whole range of scientific activities of our faculty and to strengthen the connections between the main research areas of the faculty - „Molecular Medicine” as well as „Epidemiology and Nursing Research” - and to stimulate lively discussions and active scientific exchanges. In addition, we want to reinforce new connections between clinical research, nursing science and basic research. The research day offers a unique opportunity for exchange and discussion between young scientists and experienced researchers in a relaxed and supportive atmosphere.

The program includes a keynote lecture, two sessions each with oral presentations and posters as well as the „Elevator Pitch” session, which has been successful in recent years. Special space will be given to projects by HaPKoM-fellows. There will be ample opportunity for personal exchange at the posters, during the breaks at the buffet and afterward at the get-together.

We cordially invite you to participate in the 10th Research Day of the University Medicine Halle.

You can actively present your scientific work, either in German or English, as **oral presentations or poster presentations** on all scientific topics of the University Medicine. During these sessions, novel scientific results from all research areas will be presented and lively discussed.

In the session „**Elevator Pitch**” participating scientists presenting a poster are asked to present their projects and ideas to the general audience in an exciting, engaging, inspiring, or funny way to capture their attention and curiosity. In this format, the candidates have exactly 60 seconds, the duration of an elevator ride, to present the uniqueness of their research and to earn the audience’s applause. At the end of the event, various prizes will be awarded for oral and poster presentations.

Please send the abstracts for your talks or posters by mail to prodekanat.forschung@medizin.uni-halle.de until **23.03.2025**. Please use the attached form for registration. Abstracts must **not exceed 2,000 characters** including spaces (excluding authors, institutes) and must be structured into question/ methods/ results/ conclusion.

Please also forward this invitation to your staff, colleagues and postgraduates.

We are looking forward to welcoming you to an inspiring research day where we hope to meet and connect again in person! The venue is HS 3 & 4 and the foyer in front of the auditorium in the UKH.

Your Orga-Team Research Day
